Artist Sam Jury

SAM JURY IS PERLMUTTER AWARD WINNER

The Rose Art Museum and Stephen Haller Gallery are happy to announce that artist Sam Jury will be honored on November 1st with the 2011 Ruth Ann and Nathan Perlmutter Award. The award honors emerging artists on the cusp of international acclaim. Roxy Paine, Barry McGee, Dana Schutz, and Alexis Rockman are among the past recipients.

The Perlmutter Award, which includes an artist residency, will culminate with a solo exhibition at the Rose Art Museum scheduled for Fall 2012. The museum, celebrating its 50th anniversary this fall, is located just outside Boston on the campus of Brandeis University. Famed for its extraordinary collection of modern and contemporary art, the museum is also famed for its recent controversy surrounding the possible sale of that collection by the university. The controversy, which had riveted art world attention around the world, has concluded with the collection intact and the museum continuing in its mission. The Rose has a great deal to celebrate this fall.

Sam Jury will give an artist talk at the Rose Art Museum at 5:00PM on November 1st. Her work is currently included in the exhibition *Collecting Stories* at the Rose, highlighting the history of the museum's acquisitions.

Best known for her hauntingly beautiful photography-based work and video portraits in light, Sam Jury confounds the viewer's expectations of realism by creating highly manipulated scenes where linear narrative is compressed, compromised, or suspended. *Art in America's* Edward Leffingwell describes Jury's work as "Ethereal, cinematic and literary in their affect... infused with a mysterious play of figure, palette and light."

Jury explores the gaps and fissures between moving and still imagery; painting and film. Her work originates from staged photographs or documented acts sited in overwhelming or unsettling locations giving a contemporary edge to the sublime.

Jury confounds the viewer's expectations of realism by creating highly manipulated scenes where linear narrative is compressed, compromised, or suspended. Hovering between any specific time, place or genre, Jury's work creates a world made up of associative readings. Working in the intersection between old and new traditions, her work references classic landscape painting and portraiture; yet is forward thinking and technologically nuanced, with associations as disparate as Vermeer and sci-fi, Constable and Cameron. Jury is creating a new landscape, a new portraiture. This is a painter-in-light for the digital age.

A truly international artist, Jury's first artist residency was in Sharjah UAE. She has collaborated internationally with China's Gao Brothers and has exhibited in Beijing and Pingyao. Jury was the subject of
